

Provider Notice

To: FHK Providers
Subject: Prior Authorization for J-codes
Notice Date: October 07, 2026

Dear Florida Healthy Kids Provider,

This letter serve as a 60-day notice that Florida Healthy Kids (FHK) Physician Office Administered Drugs (J-codes) will require prior authorization starting December 7, 2026.

Reason for the Change:

- **Patient Safety Controls:** Clinical PA checks ensure appropriate patient selection, adherence to FDA-approved dosing guidelines, and the monitoring of black-box warnings or severe drug-drug interactions.
- **Evidenced-Based Care Verification:** In accordance with standard AHCA Service Authorization Rules, health plans are expected to validate that specialty therapies meet objective, peer-reviewed medical necessity guidelines before administration.

To ensure a smooth transition and continuity of care for our members, please review the upcoming changes and timeline below:

October 15, 2026: A comprehensive list of medical J-codes requiring prior authorization will be available on the CCP website CCPcares.org.

November 16, 2026: Notification reminders of the PA change process will be sent to providers.

December 7, 2026: The new J-code prior authorization process officially goes live. Any J-code request submitted without an approved authorization on file on or after this date may be subject to denial. Providers will be contacted immediately to submit appropriate clinicals for CCP review. Active authorizations made before this date with active refills will be honored until the PA expiration date.

Please note: All requests must go through [PlanLink](#).

We recommend reviewing your patient rosters and upcoming scheduled treatments ahead of the go-live date to prepare any necessary authorization requests.

Thank you for your continued partnership and dedication to providing high-quality care to our Florida Healthy Kids members. If you have any questions please contact Customer Experience at **866-384-2926** or Provider Operations services at **855-819-9506**.
