Subject: Implementation of White Bagging Specialty Pharmacy Program for Select Biologics on the Physician Office Administered drug (J-code) List for FHK..

Dear Valued FHK Provider,

Community Care Plan (CCP) is initiating a mandatory white bagging specialty pharmacy program for 9 specific physician administered medical J-codes. Effective December 23, 2026, all requests for the following medical J-codes:

- Cimzia (**certolizumab**)
- Lupron Depot (**leuprolide acetate**)
- Botox (**onabotulinumtoxin A**)
- Prolia (**denosumab**)
- Xolair(**omalizumab**)
- Actemra/Tyenne (**tocilizumab and the biosimilar**)
- Alprolix (**coagulation factor IX, FC fusion protein**)
- Benefix (**coagulation factor IX**)
- Inflectra (**infliximab-dyyd**)

Must be submitted to ***Prime Therapeutics Pharmacy*** (Specialty)for white bagging services.

Reasons for the Change:

1. **Timely Access and Safety**: Medications are delivered in accordance with manufacturer g uidelines, ensuring quality, proper storage, and stability.
2. **Operational Efficiency**: White bagging reduces the overhead related to inventory manage ment and drug procurement, allowing staff to focus on patient care.
3. **Patient Centric Care**: Ensures that members receive their medications directly to office or clinic without navigating additional pharmacy processes, reducing risk of delay or error.

Required Prescriber Actions:

1. **Prescription Submission**: Providers must submit prescriptions with prior authorization forms to Prime Therapeutics Pharmacy Specialty. Please attach all relevant clinical chart notes and ICD diagnostic codes. You must indicate "***Medication to be shipped to MD Office"*** on the prescription. Without this indication Prime Therapeutics Pharmacy (Specialty) cannot guarantee it will not be sent to the member's home.

2. **Prior Authorization**: PA forms are available on the CCP website. This has not changed. The specialty pharmacy will manage the clinical prior authorization under the member's pharmacy benefit.
3. **Delivery Coordination**: The specialty pharmacy will coordinate delivery directly with your clinic/site. Medications are patient-specific, labeled for an individual member, and shipped under strict cold-chain protocols. **Do not** schedule the patient's administration appointment until your clinic/site confirms physical receipt of the medication.
4. **Storage and Integrity**: The clinic/site staff must store patient-specific medications in accordance with the manufacturer recommendations. These medications are legally tied to the specific member's insurance claim and **cannot** be used as general clinical inventory for other patients.

Claims and Reimbursement:

1. For dates of service on or after January 1, 2027, Community Care Plan will no longer reimburse providers for buy and bill services on the stated medications.

Please contact Prime Therapeutics Pharmacy (Specialty) if you have any questions or need to coordinate service via:
